Group: 9   Date: 4/3 Time: 12:55 PM   Duration: 30 min
Present, on time: Shreya Boyapati, Ayesha Quadri Syeda, Dat Huynh, Sarthak Patipati

Synopsis:
We discussed feedback from the coding demo and looked through the documentation to figure out what features we want to implement over the next couple of weeks. We also made a rough plan for testing our product. We then planned out our report and coding project report and divided up the tasks.

Recent Individual Accomplishments:
Last week, we all worked on the final sprint for scenario 2 and prepared for the coding demo. Ayesha worked on the change goal method and the restaurant search method. Sarthak worked on the nutrition plan screen and the meal plan screen. Dat worked on the signup screen and creating/adding accounts to the database. Shreya worked integrating all the modules and testing the final code.

Current Individual Activities:
Shreya will work on the progress bar. Sarthak will work on making the map screen dynamic and fixing the meal plan method to consider the user's calorie goal. Ayesha will make sure that the design of all screens is consistent and add more meals to the meals database. Dat will create unit tests for the various databases.

All will work on the coding, design, and project issues reports. We have divided up the sections so that everyone has a similar workload.

Individual Action Items:

Shreya - progress bar, 5-6 of design report, 6-9 of project issues, references, II and IV of coding report

Dat - unit tests for database, 1-3b of design report, 1-2 of project issues, index, VI & reference & index of coding report

Sarthak - map screen, meal plan close to user calories, 4d-4g of design report, 3a-3d of project issues, III and IX of coding report

Ayesha - make design consistent, add meals to meal database, 3c-4c of design report, 3e-5 of project issues, glossary, I & V & VII of coding report
